- 3. OUT-OF-CONTROL BLOGGING TRAFFIC**

## **1. CREATING YOUR OWN BLOG SITE CAN MAKE YOU MONEY!!!**

The internet has plenty of blogging sites and resources. There are thousands of blogging sites and almost a hundred contain topics such as yours. To compete with the thousands of blogging sites, you need to create your own style.

It is always easy to have your own blogging site because blogging sites allow users to set up an account for free. You just need to fill out some forms and you're done and you can start posting anytime you want without the expense. You can also add related links to your own blogging site.

You do not actually have to be a wizard if you want to create your own blogging site. Most of the people who keep up their own blogs are enthusiasts and common people. If you have your own blogging site, you can converse with someone and learn about their comments.

If you have a blogging site, it will be easy for you to market yourself and make benefits from your products provided that it has all the important facts and that can keep your customer interested.

Setting up your own blogging site means that you are creating a little space on the Internet where you can update and make posts on your own with just about anything that interests you.

Of course, your blogging site will have variety of topics within your specialty. If you want to make money with your own blogging site, you need to have multiple blogs with different topics. If not, your blogs will be too messy if all topics were all posted into one blog.

Now to have a good blogging site, you can post anything from your hobbies to your interests. There are lots of people who can get interested in reading your blogs. If your blog is interesting and can give knowledge to the people, they might visit your blogs more often.

In having a good blogging site, you need to come up with interesting topics. It is important that you know your target and you know what they like to read about.

If you personally love dogs or a certain type of pet, you can write about it and post it in your blogging site. You can include useful information that the readers may be interested about. Blogging sites are a good resource for knowledge and information. If not, what will be its use anyway?

If you have your own blogging site, you can start using AdSense to it. AdSense program

can give you enough money and increased traffic out of your blogging site.

If you want to upgrade your own blogging site, you need to have at least 10-15 pages which has relevant contents. You also need to have 5 posts on your blog.

To apply AdSense in your blogging site, it should have an interface that is easy to use and it has to be clean. All pages must be working and it should not contain broken links or under construction pages. It should not contain popups and animated gifs.

Your blogging site does not need professional designs. It can stay simple because designs are not the main requirement. If you have simple designs and a simple site overall, it will have more chances to get searched in the search engines. Users will also find your site easy to navigate because it is readable and not confusing.

## **2.MAKE MONEY THROUGH BLOGGING**

We all do things for different reasons, and that is also true with blogging. Some bloggers just want to share individual experiences to love ones, talk about what interests them, and in many cases to make money. There are many successful bloggers who earn hundreds, or even thousands of dollars in a very short time especially when done appropriately.

Today's blogging scene offers monetization options that many do not know about. You can find direct advertising options as well as affiliate offers. There are endless possibilities of earning money through blogging. However, without TRAFFIC, these options will definitely not work. If your blog site doesn't have enough traffic, you will not earn any money.

Here are some monetization options that you can embark in, supposing that you already have a great traffic.

For starters, you can use internet services like PayPerPost and ReviewMe. The good thing about these services is that they aren't related to click through rates, traffic, and other related metrics. This is an excellent option for bloggers with a hectic schedule. When you write a review, you will also have a good source for your blogs.

You can produce revenues directly by choosing this option. However, there are some things to remember. Don't let the services control your posting routine. A lot of sponsored posts often lead traffic away, make your website less attractive, and lowers your credibility. Make sure that you accept only the reviews related to the blogs that you're making.

You will have more options if the revenue is based on the readers actions, purchases, and participation. A good example is affiliate offers. With this option, you should have the aptitude to inject the existing contents of your blogs with the offers that let you earn money.

Suppose your blogs are all about repairing credit, make sure that you provide links and advertisements for services associated with credit repair, credit reports, and other related services or products. Expect to yield dazzling returns in no time at all. Key players include NeverBlueAds, AzooglesAds, Share-a-Sale, and Commission Junction. You can find lucrative offers by visiting them online.

If you want a less invasive option, this is what's for you ? try introducing content-based advertisements on the pages of your website. Based on the content of the pages, the displayed ads are automatically generated. Publisher Network of Yahoo and Google AdSense are some of the greatest players in this particular arena.

If you try them out, you can also expect outstanding results. Each time someone visits your blogs, you can earn money. The ads are part of the bloggers website and so you can

earn more money. You will also be able to provide your audience with related contents that they may find quite useful.

So what are you waiting for? Choose the money making option that will work for you. There are so many options out there but not all of them will work for you so you'd better choose the best one. Make money through blogging. If you want to be a successful blogger, you must have the right attitude and qualities.

If you use your talent appropriately, you can earn money for a long period of time. Log on to the internet now especially if you have the skills to become a blogger and don't let this rare opportunity pass.

### **3.OUT-OF-CONTROL BLOGGING TRAFFIC**

Couples of years ago, blogs were not mainly used for web sites to promote their stuffs. It is quite unimpressive to find out that blogs are taken advantage of by the online marketers. However, we cannot take control of that because its everyone`s freedom to post anything they want on their own web blogs

Much worse, blogging popup is everywhere and it is uncontrollable. Whether you like it or not, they will pop on your screen and try to point you anywhere. Some of them may be useless while some may not be useful at all.

Blogs were originally used by kids in keeping diaries or everyday journal. This had been a good alternative to writing down handwritten diaries so that their parents could not find it. Anyone can easily access or have his or her own web blog. It`s as easy as signing up and in a few seconds, you can start managing and posting your own blogs.

Although blogs may be useful, others don`t seem to like it because of the blogging popup as they call it. When you are in the middle of a serious research in the web, a lot of blogging popup sites will come up and you might lose all your patience.

You can always close or minimize the blogging popup but after a few minutes, another one will show up. This is the reason why blogs earn disdain and people discourage the use of it.

If you are using blogs as a journal or a diary, you need to keep it personal if you don`t want other people to read it. Although there are still chances that other people might find it, they will not know whose blog is it.

When you suddenly find blogging popup, you might get attracted to the ad and the message it displays. Some blogging popups will let you fall into a pit or point you to other websites which have no relevance at all.

Blogging popup is used by some online marketers especially those who are new to it. They make popups to get heard and increase traffic to the sites they are promoting. Although web blog hosts are preventing this from happening, still, some of the blog sites find a way to get through with the use of some strategies.

Blogging popup is considered spamming. Blogs may contain several and numerous links that point to a certain site. Some of the bloggers who maintain the postings of the blogs are the ones who write the content. When you read through the article, you will find out that the content does not have any relevance to the theme of the site.

What these blogging popup contains are keywords which have links. You will also notice that some of the contents are duplicated or repeated so that it will look like a long article.

Some of the blogging popups are called mini web sites because it contains information and links and other related websites that you can jump to. Most of the related websites are considered as cousins because they all point to a single website or a place where you can find the same information.

You might have heard of someone getting freaked out when blogging popups are all over but you can never really do anything about it.
